

User Stories Defined

1. As a doctor I want to be able to view the population of the specific region so that I can deliver necessary vaccinations to all people.
2. As a market analyst I want to be able to view the population of capitals cities so that I can analyze it and make predictions on sales.
3. As a data scientist I want to be able to search for specific districts of countries by entering first letters so that I would spend more time on other productive tasks.
4. As a data analyst I want to be able to add and edit data easily so that I won't spend lots of time writing SQL codes.
